

It's not just about Driving, It's about Living....

How big a problem are accidents and deaths from teen driving?

- The leading cause of death among 13-19 year olds in the US is from a motor vehicle crash.
- 62% of teenage passenger deaths in 2004 occurred in vehicles driven by another teenager.
- Teenagers cause 2.5 million accidents per year.
- In 2007 that resulted in over 6,000 deaths of teens.

If you have a teen driver at home or know someone who does, then those sobering statistics should be of concern. Recent and well publicized national stories have brought to light the tragedy of teen injury and death caused by traffic accidents. The stories often mention how the teen driver "lost control and over-corrected..." causing a tragic accident of some kind.

Milwaukee Region SCCA will be holding its first Tire Rack Street Survival class On June 27, 2009 at the Milwaukee Area Technical College – South Campus. Please visit www.StreetSurvival.org for additional information and to register for the class.
